

PharMax™ combines its unique inventory software with the reliability of carousel technology to streamline your drug distribution process. PharMax™ works with your existing pharmacy system to prioritize the daily drug fulfillment process. By employing barcode and “pick to light” or “pick by location” technology, PharMax™ enhances employee efficiency and improves dispensing accuracy while maintaining a perpetual inventory. These features, along with its affordable price, make PharMax™ a logical choice for your pharmacy.

**Key Benefits:**

- Maximizes efficiency in workflow and order fulfillment
- Barcode Utilization with Order Fulfillment, Re-stocking, Returns, and Invoices
- Pick by “Light” or pick by “Location” –Maximizes drug location utility
- Perpetuates Inventory in Carousel, Remote Shelving, and Remote Locations
- Increases inventory turns
- Eliminates redundant activities
- Reduces Inventory storage footprint
- Our software is designed with the user in mind
- Interfaces with Automated Dispensing Systems, Pharmacy Software Drug Wholesalers, Packaging Systems, and 340B Management Software

**Main features:**

- Low cost solution
- Interfaces with existing pharmacy order entry systems
- Interfaces with wholesaler and ADU systems for automated inventory replenishment
- Maintains drug order queues
- Prioritizes “stat” orders above routine orders
- Maintains a perpetual inventory
- Utilizes bar code scanning to enhance dispensing and restocking accuracy
- Optimizes drug storage capacity
